MetroAgriFor intends to create an active and stimulating forum where academics, researchers and industry experts in the field of measurement and data processing techniques for Agriculture, Forestry and Food can meet and share new advances and research results.

Attention is paid, but not limited to, new technologies for agriculture and forestry environment monitoring, food quality monitoring, metrology-assisted production in agriculture, forestry and food industries, sensors and associated signal conditioning for agriculture and forestry, calibration methods for electronic test and measurement for environmental and food applications.

WORKSHOP TOPICS

THEMATIC AREAS :

- A. Metrology, quality assurance and standardisation
- B. Sensors and measurement techniques
- C. Data analysis
- D. Applications

The MAIN TOPICS include, but are not limited to:

1. Sensor networking and integration
2. Approaches and tools for measuring Food Quality
3. Soil analysis, mapping and monitoring
4. Crop analysis, mapping and monitoring
5. Precision agriculture, forestry and livestock farming
6. Measurements for agriculture, forestry and environment
7. Agroclimatic measurements

IMPORTANT DEADLINES

31 August 2018 – **Abstract Submission**

9 Sept. 2018 – **Abstract Acceptance Notification**

10 Sept. 2018 – **Early Bird Registration**

The Workshop proceeding will be published by IOP Conference Series: Earth and Environmental Science and indexed in the leading databases of scientific & engineering literature, including Inspec and Scitation. Full paper submission will be after the Workshop Outstanding papers will be invited to be extended and considered for publication in special issues of renowned journals.

PAPER SUBMISSION

Papers are sought on every aspect of measurement and data processing techniques for Agriculture, Forestry and Food. The list above is given as guidance. The proceedings will be published by **IOP- Conference Series Earth and Environmental Science** and indexed in Scopus, Inspec etc.

AWARDS

The best presentations at the Workshop will be awarded.

SHORT COURSE

A Short Course on Measurement and Uncertainty will be held on the days of the Workshop to provide the basics of measurement, calibration and uncertainty evaluation. The Short Course will cover key aspects, including issues in calibration, calibration standards, the choice of a measurement instrument, measurement in field condition, uncertainty evaluation, digital signal processing etc., and feature a lecture on **“Measurements for Drones and Drones for Measurements”**. See www.metroagrifor.org for further details and information.

LANGUAGE

The official language of the Workshop is English.

The Workshop will be held at the premises of the Faculty of Engineering of Università Politecnica delle Marche.
