

2020 IEEE INTERNATIONAL WORKSHOP ON

METROLOGY FOR AGRICULTURE AND FORESTRY

04-06 NOVEMBER 2020

CALL *for* PAPERS

for the Special Session on:

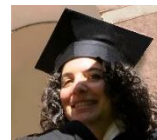

PRECISION LIVESTOCK FARMING AND FEEDING

ABSTRACT

Modern animal productions must face continuous challenges to feed people around the world in sustainable and environmental friendly ways, assuring animal welfare, health and safety of products. In the age of IoT, non invasive, real time and contactless detection of animal parameters represent the basis of modern processing of big data related to welfare, health, production and macro- as well as micro-environment.

Topics of this session will span from basic automated management operations in farms to sensors and software for the interpretation of animal parameters. Pioneer authors dealing with such breakthroughs are highly encouraged to contribute with latest results from their research to the workshop.
